AIPA Bulletin--Published first week of each month, 12 issues per year.
Membership--\$2.00 per year (entitles one to monthly bulletins, report
forms, membership card and miscellaneous items) Payable to secretary.
Editorial....

Since the draft decided to bypass me, at the last minute, via
deferment, I'll still be in the same shoes as Eastern editor, secretary
and so on. Thus, I will continue as Eastern DX editor and all Eastern
reports (east of the Mississippi) should be sent to me. However, since
M.W. DeGeer Of Tulsa, Oklahoma is resigning as Meteor skip editor, due to
pressure of other work, we will need a new editor for the Meteor Skip
Column. As it stands now, I'm planting Carl Lupton with this chore. So,
all Meteor skip reports should go to Carl F. Lupton, R.R. #3, Shelbyville,
Illinois, for the April AIPA bulletin. Please remember this fellows, and
have those reports to Carl by March 27th. Best of luck Carl! Many thanks
to you also Mr. DeGeer, for a job well done as MS editor.

Recent membership renewals include: Carl Lupton; M.W. DeGeer, Ed Rugel.
New members are: Kenneth Moses, 310 West A. St., Newton, N.C.;
James Hardwicke, Fouquier, B.C.-Canada; M.H. Andrews, 2808 East 8th St.,
Cheyenne, Wyoming; Raymond O'Rear, Box 113, Zillah, Washington; Allan
Livingston, 2807 East 37th Place, Tulsa, Okla.; Claude Earle Robertson,
Independence, Louisiana; Don D. DuMas, 1220 W. 74th St., Los Angeles 44, Calif.
A hearty welcome to all!

To anyone interested, AIPA letterhead stationary, envelopes (large size)
are available from Art Collins, 68 Amber St., Buffalo 20, N.Y. Write him
for prices. Up-to date TV station lists, with info on networks, starting
dates, upcoming new calls (stations) and other interesting info, are
also available from Art at \$.20 per list (complete).

The annual AIPA election will be coming up next month, so some thought
should be given as to your choices to handle AIPA offices in following
year. Bedford Brown will probably handle the election, as he did in 1956.

A note from Ed Fournier relates that he is having a whale of a time
in South America, visiting Montevideo, Uruguay and other sites. Glad to
hear from you Ed.

More new members.... James F. Habermehl, Clarington, Ohio; Edward
Farrell, 36-17 171 Street, Flushing 58, New York; Charles W. Stephenson,
726 Westwood Drive, San Antonio 12, Texas.

Yours truly man also report a very interesting letter from an
Australian DXer. Mr. George F. Palmer (operator of Palmers Telecinema)
of Melbourne, sports a 100 ft. tower, with yagis for channels 2, 3, Rotor,
Astiaetic booster, a vertically polarized antenna cut to 41-45 mcs., also a
English booster with a English receiver and other equipment. He's ready
for F2! Hi... His address: 12 Ferry Street, Williamstown, W.16, Victoria-
Australia, in case anyone is interested.

Deadlines for April bulletin: ~~4/11/57~~ Cardington, Ohio ("Rank"), Buffalo,
(for FCC news), March 25; Tampa, Austin, Shelbyville, March 27; Dunkirk, (for
Western DX), March 28; Dunkirk, (for Eastern DX), April 1. Best to all.

All of us sooner or later have to have some sort of service performed on our DX equipment. If we are in a position to do same ourselves alright, but the column this month will be for those who must call in an outside man.

To point out a good example of poor service here in his own words is what happened to Paul Swartz of Gibsonburg, Ohio.

"Our local serviceman is a fine man and I mean this incident as no discredit to him, but I'm afraid that he goofed in installing a new antenna for me last spring. The antenna, a Trio Zephyr Royal, seemed to work fairly well on most channels, but had very sloppy directivity, with the reception from channels better from the rear. Inspecting the installation with binoculars, I saw the trouble immediately. This antenna is designed to take a lead-in at the rear of a set of three dipoles, but the lead-in had been connected at the center dipole instead. Quoting the serviceman - "It took less line, and the dipoles are all connected together anyway." Well, Paul got the man to correct the installation, and now reports everything is back to normal.

An even worse service problem happened to Art Collins. The front end (tuner) of his receiver was acting up, so he sent same to the factory supervised service division of his set's manufacturer. When the set was returned to his home, his local reception was perfect, but DX wise it was very poor. After many call backs from the service company, Art solved the problem by junking the receiver with the problem and purchasing a new one.

Now by all means I am not trying to give the impression that all TV service men are dishonest and stupid. The vast majority are hard working, dependable and well learned men in their profession. The ones to watch out for are the "Tube Jockeys", "Screwdriver Boys" and "Basement Wonders". If any of your expensive equipment falls into the hands of these lads-- you're sunk! I believe the basic problem is the fact that the ordinary TV receiver only wants good reception from his or her local television outlets. So that is why servicemen in most areas only consider their service work limited to this point. Now the servicemen are quite correct there, as why should they perform work that the customer won't appreciate or even require? In the end it would only promote bad feelings for the serviceman, on the basis of a bigger bill for his various customers. It is also true that most television receivers can deliver fair reception from the locals, but outside of that are not of much use.

If and when you do call in a man, I have found that just letting him know in a friendly manner that you use your set for distant reception, and would appreciate it if he would check on any condition in said receiver that would affect it, you'd get best results. The same applies to antenna installation men.

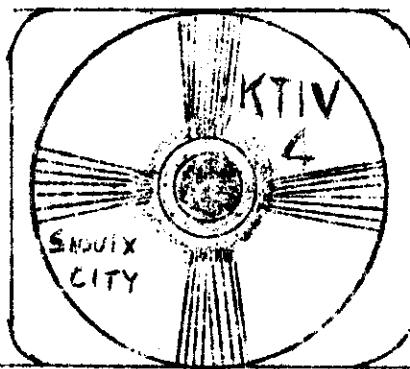

We should all give the servicemen a big hand, as without them not only would TV DX be impossible, but the whole concept of television broadcast.

Coming UP.....

Soon we be taking up matters on MS, UHF, antennas, etc, as material is gathered. -30-. 73's

"International DX Column" Compiled by Richard Lowry.
First off I would like to thank the fellows who contributed to the column this month. They seem to be relatively new members- thanks to each of you. As follows is a new list of BBC stations and their respective British channel numbers. Thanks to Jim Dillon of Regina, Saskatchewan, Canada.

Location.	Channel.	Location.	Channel.
Crystal Palace	1	Norwich	3
Divis	1	Pontop Pike	5
Douglas, Isle of Man	5	Rowridge	3
Holme Moss	2	Sandale	4
Kirk O'Shotts	3	Sutton Coldfield	4
Les Platons, Jersey	4	Truleigh Hill	2
Meldrum	4	Wenvoe	5
		North Hessary Tor	2

Also from Regina, Sask. Bert Webb send along the information that Canada is building a 137 station ~~#~~ network across the country.

Mr. Gene Webb of Seattle, Washington sends along the following exerts from newspaper clippings.... Jan. 23 Elvington, England.- TV Viewers in this small community have been bothered by American voices booming in over their TV reception. Post Office officials said that the voices came from U.S. Police and taxicab transmissions.

Nov. 15, 1956 Seoul, Korea.- U.S. troops in Korea to get TV through the facilities of a main USAFRTS station in Seoul and a system of low power relays in the areas of troop concentration.

As a closing note Pres. Bob Seybold sends word of a fellow in far off Australia who is very interested in TV DX. He has a 100 foot tower, 10 element Yagis, and an English receiver and booster, ready for any F2 that might come along. There are three stations in Melbourne which he receives.

Well, fellas, that's it for this month. Let me again urge one and all to contribute any I-DX info that you might find.

Best od DX to all and 73- Richard Lowry 1204 So. 31st. Temple, Tex.
